

## Vögtlin Instruments AG Corporate Information

# It's flowtime!

# Flow is our passion – for more than 20 years

«Finding the best flow solutions for our customers using experience and new ideas:

That's what we call our **Spirit of Flow!**»

A handwritten signature in white ink on a light blue background.

**Fabian Waltz**  
Managing Director Vögtlin Instruments AG

Vögtlin Instruments AG offers high-quality devices and solutions for your flow measurement and control tasks.

**Profit from our many years of experience as developers, manufacturers and service partners.**

## Competence and Innovation

Our challenge is to offer our customers long-term benefit with innovative products, professional advice and personal commitment.

## Swiss Quality and Service

All flow measurement devices are manufactured in our factory in Aesch and are calibrated according to international standards. We have been certified to ISO 9001:2000 since 1996. Our products and processes are subject to constant quality assurance.

## International Presence

In many countries, we work together with local sales partners, who can offer you the entire range of Vögtlin Instruments AG products and services.

## Maximum Flexibility

Thanks to our high-performance production processes and equipment and our close relationship with our logistics partners, we are always in a position to react flexibly to the wishes of our customers.

We will be pleased to hear from you at any time.

## Our Products:

### Mass Flow Meters and Controllers

### red-y smart series

## RELIABLE AND PRECISE

- \* Highest accuracy and turndown ratio
- \* Digital and analog interface standard (Modbus, Profibus, etc.)
- \* Very short response time for meters and controllers
- \* Real gas calibration

Media: Gases

### Mass Flow Meters

### red-y compact series

## DIGITAL CONVENIENCE

- \* Insensitive to pressure and temperature changes
- \* High accuracy and turndown ratio
- \* Battery power or 24 Vdc supply
- \* Alarm functions, Totalizer and manual needle valve

Media: Gases

### Variable Area Flowmeters

### V100

## WIDE-RANGING AND MODULAR

- \* Highly modular, customizable for any mounting position
- \* Connections on the back side, lateral or axial
- \* Measuring tube in 3 sizes, body in aluminium or stainless steel
- \* Variety of options: Limit switch, front panel mounting-kit, etc.

Media: Gases and Liquids

### Variable Area Flowmeters

### Q-Flow

## ATTRACTIVE DESIGN AND PRICE

- \* Compact and slender design
- \* Measuring tube in 3 sizes, body in aluminium or stainless steel
- \* Panel mounting design (plug-in)
- \* 15-turn micro-valve for smooth and accurate adjustment

Media: Gases and Liquids

### Micro-Valves

### M-Flow

- \* Leak-proof when closed
- \* Flow adjustable from 0.5 mln/min
- \* 15 turn spindle, no hysteresis
- \* Cw- or ccw-closing

Media: Gases and Liquids

### OEM-Applications

We have specialist know-how in designing and implementing individually optimized flow applications. We look forward to developing a solution with you.
